# Remove ISDone.dll Error while installing games

This is a Two-Step Process:

- Install isdone.dll and unarc.dll and then setup them.
- Change System settings.

Step 1:

Download isdone.dll file & unarc.dll

Link for isdone.dll:

https://www.dll-files.com/isdone.dll.html

Link for unarc.dll:

https://www.dll-files.com/unarc.dll.html

After downloading, extract them & then go to C:\Windows\System32 and paste extracted files.
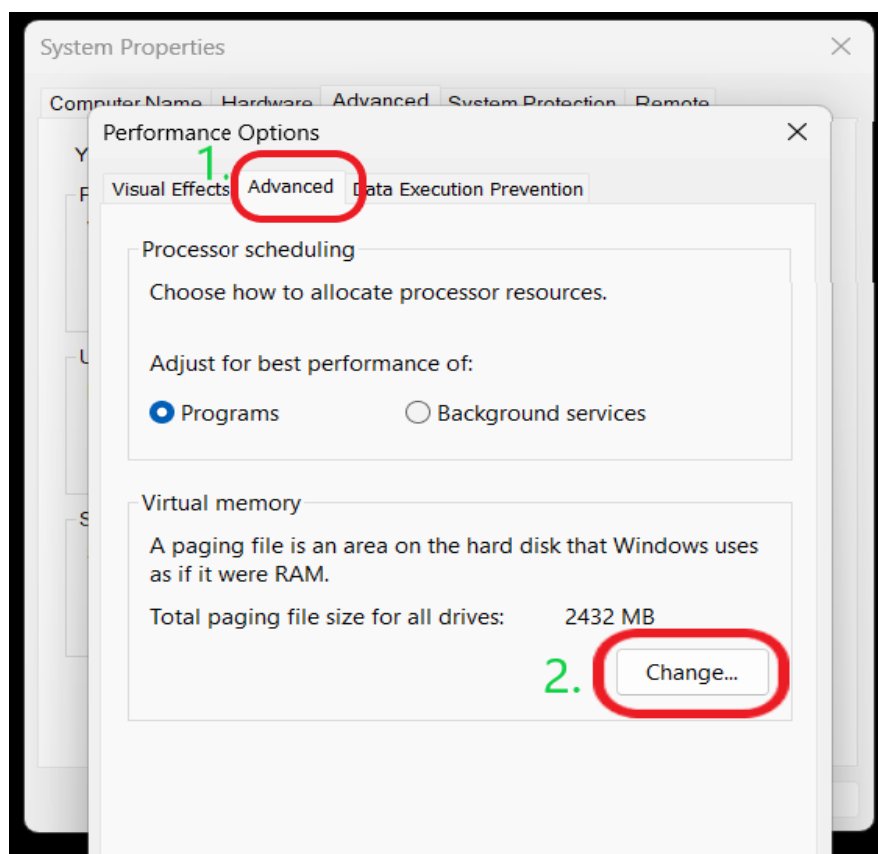

Step 2:

- Open **Run** and type **sysdm.cpl**. Press OK.

- Then go to **Advanced** section and then click on **Settings**.

- After that in next interface go to **Advanced** and then **Change** Button.

- Uncheck Automatically Manage option and then Check Custom size

- Now fill the Initial size and Maximum size equal to or greater than the Recommended paging file size for all drives

And then click on ok and apply all the fixes.

Now restart the device and then try to install the stuff that you are trying to do before.
